PROFILE

A results-driven and adaptable software developer with a background in Business and IT. Proficient in R, Java, PHP, JavaScript, Node.js, MySQL,React Express.js, HTML, and CSS, with a proven ability to design and implement web and data-driven applications. Demonstrated leadership in curriculum development and coordination. Actively building hands-on projects on GitHub and eager to contribute to forward-thinking tech teams.

STRENGTHS AND EXPERTISE

Full-Stack Web Development
Object-Oriented Programming (OOP)
Data Analysis (R, MySQL)

Curriculum & Content Design
Project Coordination & Teamwork
RESTful API Development

Git & Version Control
Responsive Web Design

TECHNICAL PROJECTS

Smart Climate Agriculture
Node JavaScript
Developed a web application aimed at assisting farmers with climate-smart agricultural practices. The platform provides real-time weather updates and farming tips to enhance productivity.

Taxi Booking System
PHP, TypeScript
Engineered a comprehensive taxi booking system with separate repositories for backend and frontend. Implemented features include user authentication, ride scheduling, and fare calculations.

Sports Field Booking System
PHP
Created a platform that allows users to book sports fields seamlessly. Integrated calendar views, booking confirmations, and administrative controls to manage reservations effectively.
